TOMCAT WEB SERVER

Apache Tomcat is an open-source web server that supports Java Servlet and JSP (JavaServer Pages) technologies. It is used to run Java-based web applications. Here are some key details about Tomcat:

Key Features

- **Servlet Support:** Supports the Java Servlet API to create dynamic web content.
- **JSP Support:** Allows you to write Java code within HTML using JavaServer Pages.
- **Performance:** A lightweight and fast server that offers high performance.
- **Open Source:** Developed by the Apache Software Foundation and is available for free.
